

BURN 800 calories, KILL your electric BILL, SAVE the PLANET, all while watching NASCAR.

Bike power generator \$595
Windstream Power LLC.

**I Sell My Workout
Back to the Grid.** First, go
get your electric bill. My bill says I
use about 6 kWh daily. How much is
this in pedal power? I can knock that
off in the hours I spend watching TV
... and burn 800 calories, **SHAZAM!**

Electricity bill	- \$60
Gym membership	- \$60

Savings each month	\$120
---------------------------	--------------

BRIEF: There are many power-generating pedal set-ups available on the web, but none is a stand-out. In an age of growing concern for sustainable energy options, a trend to save money, and concern about obesity, aren't we missing out on a simple way to solve more than one problem at once? Human-generated electricity! This is a home appliance that will help you get fit, save money, and become less dependent on the power grid.
